## DETAILED ACTION

### *Information Disclosure Statement*

The information disclosure statement (IDS) submitted on 6/17/2004 was considered by the examiner.

### *Drawings*

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because apparently essentially none of the reference numeral leader lines point to their intended specific device element. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1 and 2** are rejected under 35 U.S.C. 102(b) as being anticipated by Tipton (3,634,985).

Art Unit: 3635

Tipton discloses a structure (10) leveling device (18) comprising:  
a structure floor (15);  
an opening in said floor (openings exist in all four corners of the floor, see Fig. 1);  
an adjustment member (16) extending through said opening in said floor; and  
a foot (60) in communication with said adjustment member and a mounting surface (ground surface, see Fig. 1).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3 - 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tipton.

**Claims 3 and 4** - Tipton discloses all the claimed elements as described above, except automatic levelling. It would have been obvious to one having ordinary skill in

Art Unit: 3635

the art at the time the invention was made to automate the levelling, since it has been held that providing an automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Veneer*, 120 USPQ 192.

**Claims 5 and 6** - Tipton discloses all the claimed elements as described above, except a hardened foot and a metal adjustable member. It would have been obvious to one having ordinary skill in the art at the time of invention to use a specific material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
